Plug it into the socket

Filip Joelsson

How are websockets different from...

- HTTP
- REST
- GraphQL

HTTP

Similarities:

- Not encrypted

- No built-in auth

Differencies

- Cachability

- Overhead

- Push

REST/GraphQL

Similarities:

- None

Differencies:

- WS and REST/GQL are orthogonal

- WS can transport the data

Suggested use

- HTTP/S for all static resources

- Websockets for connecting a SPA to the messagebus on the server

- For active components, judge on a case-by-case basis

Demo time!
